

# My Bitcoin Deposit Book

a savings booklet

This booklet belongs to:

\* \* \*

*No private keys or secret words are stored in this booklet.*

## My Bitcoin Deposit Book

How it works

### Printing & assembly

Cut every sheet into 3 strips along the dashed lines, then stack all strips in order and staple along the left edge (dotted line).

### Using a check

RIGHT side -- big QR of the address. Someone scans it with a wallet app to send sats here. Tear it off once deposited.

LEFT stub -- stays bound. Small QR opens the address on mempool.space (free block explorer) to check the balance.

### Recording a deposit

Fill in date, sats received, and cost basis (what those sats were worth in dollars that day). Copy into the ledger too. This booklet only holds PUBLIC receive addresses -- it can't spend anything, so it's safe to lose or leave lying around. The secret words that control spending live elsewhere, on purpose.

m/84'/0'/0'/0/i (BIP84 native segwit, receive chain)
